

PROGRAMME DESCRIPTION

The Ph.D. Program in Accounting offers inter disciplinary training that develops the student's expertise in conducting both analytical and empirical research. The program is designed to provide students with opportunities to learn to develop their own research ideas through a formal coursework during the first years. Our distinguished faculty conducts interdisciplinary research across a wide variety of specializations, including Accounting Information Systems (AIS) and political economics, Auditing Financial accounting and reporting, Taxation, Information intermediaries and corporate networks and other different fields of accounting. Accounting is used in every sector of today's world, so the study is highly linked with the departments like Hospitality Management, Business Management, Culinary Arts, Pharmacy, Engineering, Dentistry, Nursing, Medical Science and others. Students gain additional exposure to research through seminar, workshops as well as through research assignments and joint projects with faculty. The demand for skilled accounting educators is strong, and doctoral graduates in accounting can pursue considerable placement all over the world.

For successful completion of PhD degree in LUC, each candidate should publish minimum of Four research articles in scopus indexed journals, with Lincoln affiliation.

PROGRAMME AIM

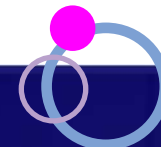

The aim of the programme is to train students in research of highest international quality in Accounting. The purpose of this program is to encourage students to make unceasing and diligent efforts to pursue holistic self-development, to cultivate self-discipline and integrity, to nurture creativity into broad-minded future leaders with international outlook.
