

PROGRAMME DESCRIPTION

This programme of Lincoln University College, prepares the students as Public Health Care Professionals. Students, of this program learn about the varied aspects of clinical care. They are also made aware of the importance of improvement and the necessity of frequent supervision of the health care procedures. As far as the educational aspect is concerned, we give utmost importance to the aspects related to interdisciplinary health care. Theoretical learning as well as practical based learning is offered by our qualified teaching staffs.

For successful completion of Masters degree in LUC, each candidate should publish minimum of Two research articles in scopus indexed journals, with Lincoln affiliation.

PROGRAMME AIM

Our aim is to offer the students, a basic understanding of the public health care practice. So that they are able to adopt measures, for the promotion of the well being of the people, to provide relief from pain and also discover the factors associated with risk.

Our training sessions primarily focuses on the attainment of the nursing skills by the students. We also instruct the students regarding the fact that health care practices should be conducted with strict adherence to medical ethics.
